
Memphis-Shelby County Airport Authority (“Authority”)

**Addendum No. 1
To
Request for Bids 20-1440-01
For
Dewitt Spain Airport Apron Rehabilitation - Construction**

Issue Date: January 23, 2025

RECITALS

WHEREAS, The Authority issued a certain Request for Bids, MSCAA Project 20-1440-01 Dewitt Spain Airport Apron Rehabilitation – Construction, issued on 2/23/25 (the “RFB”); and

WHEREAS, The Authority now wishes to amend certain of the Specifications and Drawings set forth in the RFB;

NOW THEREFORE, in consideration of the mutual covenants, agreements and conditions set forth in the RFB:

CLARIFICATIONS:

1. After consideration of the complexity of integrating the FDR and variable depth P-208 crushed aggregate base course, a modification to the design is being made to simplify construction and related testing. This change is being made so that ASTM D6938 nuclear gauge testing procedures would be useable over the entire site, whereas it may have resulted in poor compaction test results where the P-208 fill was less than 6 inches. The design pulverizes the existing asphalt and cement treated soil base course (top 6”) in the areas noted as FDR. The design then follows with cement stabilization in areas of minor grade change, and uses more traditional reconstruction methods with a uniform P-208 base course in areas of moderate grade change.

SPECIFICATION ATTACHMENTS: The following specification has been included with this Addendum.

1. Replace P-101 pages 2 through 4 with Addendum No. 1 P-101 pages 2 through 4 attached to this addendum. (Revised disposal of millings from onsite to offsite)
